

WordPress Installation Guide

This document contains the Keychain Pixel code and step-by-step instructions to help your developer install site tracking and the newsletter popup on your website.

What is the Keychain Pixel?

The **Keychain Pixel** is a lightweight JavaScript tracking script that you install on your website to collect visitor activity and engagement data.

Once installed, the pixel automatically tracks page views and user interactions, then securely sends this data to your **Keychain Marketing Dashboard**, where you can analyze traffic and visitor behavior in real time.

How to Add the Keychain Pixel to Your WordPress Site

Follow the steps below to install the Keychain Pixel on your WordPress site.

Step 1: Log in to WordPress Admin

1. Go to your **WordPress Admin** dashboard.
2. Enter your credentials and log in.

Step 2: Install a Header Scripts Plugin (Recommended)

1. Go to **Plugins** → **Add New**.
2. Search for "Insert Headers and Footers" or "WPCode".
3. Click **Install Now**, then **Activate**.

Step 3: Add the Keychain Pixel Code

1. Go to **Settings** → **Insert Headers and Footers** (or **WPCode** → **Header & Footer**).
2. Paste the [Keychain Pixel code](#) in the **Header** section.
3. Click **Save**.

💡 *Using a plugin ensures your pixel code survives theme updates."*

Alternative: Edit Theme Directly

1. Go to **Appearance** → **Theme File Editor**.
2. Select **header.php** from the right sidebar.
3. Paste the [Keychain Pixel code](#) just before the closing `</head>` tag.
4. Click **Update File**.

⚠️ *Direct theme editing may be overwritten during theme updates. Using a plugin is recommended."*

Step 4: Verify Installation

1. Visit your WordPress site to trigger the pixel.
2. Log in to your Keychain account.
3. Navigate to **Marketing** → **Dashboard**.
4. Confirm that new visitors or page views are appearing.

Keychain Pixel Code Snippet

Add the following code just before the closing `</head>` tag in your website:

```
<script>
(function (config) {
  'use strict';

  if (!config.pixelId || !config.apiEndpoint || !config.cdn) {
    if (typeof console !== 'undefined') {
      console.error('[Keychain Pixel] Configuration incomplete');
    }
    return;
  }

  window.keychainPixel = window.keychainPixel || {};

  var pixel = window.keychainPixel;

  pixel.init = function () {
    if (document.getElementById('__keychain_pixel__')) return;

    var script = document.createElement('script');
    script.async = true;
    script.type = 'text/javascript';
    script.id = '__keychain_pixel__';

    script.dataset.pixelId = config.pixelId;
    script.dataset.apiEndpoint = config.apiEndpoint;
    script.dataset.cdn = config.cdn;
    script.src = config.cdn + '/keychain/pixel.js';

    document.head.appendChild(script);
  };

  pixel.init();
})(({
  cdn: 'https://assets.keychain.com',
  apiEndpoint: 'https://pixel-edge.keychain.com',
  pixelId: 'MANUFACTURER_DGEV4EEHXQ_TWGVISQ0',
}));
</script>
```
